

## **TRIO WABAC**

### **ALL PURPOSE CLEANER**

**TRIO-WABAC;** It is a water-based concentrated product used in the cleaning of mineral oil, carbon, grease and dirt deposits formed on the deck, living space, machine room, hand tools, machine parts and equipment.

#### **PRODUCT FEATURES AND BENEFITS**

- It is a general purpose product with high concentration and intense foam.
- Suitable for use in ultrasonic machines and high pressure cleaning equipment.
- It is a fragrant and ecological product. It eliminates bad smells after cleaning.
- It is not corrosive, it can be used safely on all kinds of surfaces. It does not damage the paint.
- It is low toxicity and dissolves in nature.
- It does not contain hydrocarbon and solvent components.

#### **DOSAGE AMOUNT AND INTENDED USE**

The dilution rates may vary depending on the amount of pollution. The product can be used with spraying-brushing, spraying point and immersion methods.

**Spraying and Brushing:** Depending on the contamination rate, 1/5-1/10 diluted solution (concentrate can also be used according to the contamination rate.) is preferably heated to 50-55 ° C and sprayed on the surface. It is expected to react for 10-15 minutes. After cleaning, rinse with plenty of water. Mechanical application can be performed by brush or wiping to speed up the reaction process.

**Spot Cleaning:** Depending on the degree of pollution, the product diluted at 1/5-1/10 is applied to the surface and allowed to react for 30 minutes and washed and rinsed with the help of a pressurized water jet.

**Immersion Method:** The disassembled parts are immersed in the chemical in concentrated form (up to 1/5 according to the contamination status.) It is expected to react for 30-40 minutes and rinsing is performed with plenty of water.

The solution, which is prepared at a rate of 1-5% in general purpose cleaning, can be used in brush,spraying(spraying) or ultrasonic cleaning tanks.

**NOTE: Please review the MSDS reports before use for safety, occupational health and safety.**
