

# **TRIO WASH HP**

## **WATER BASED FOAM CONTROLLED ALKALINE CLEANER**

**TRIO-WASH HP;** It is a foam-controlled alkaline concentrated product that quickly dissolves mineral oils, hydraulic oils, fuel oils and dirt deposits.

### **PRODUCT FEATURES AND BENEFITS**

- Suitable for use in high pressure cleaning machines.
- It is easily used on painted surfaces. It protects the surface by leaving brightness after cleaning.
- It is a concentrated product, used by diluting with water.
- Phosphate does not contain hydrocarbon components. Biologically degradable in nature.
- Suitable for general purpose in engine room, board and deck.

### **DOSAGE AMOUNT AND INTENDED USE**

It is possible to dilute 1-20% depending on the amount of pollution. Suitable for use with brush, cloth or spray.

It is possible to dilute 1-5% in use with a high pressure cleaning machine. It is applied evenly to the surface by using low pressure with a high pressure cleaning machine. It is expected to react for 3-5 minutes and the cleaning process is completed with the help of high pressure.

**NOTE: Please review the MSDS reports before use for safety, occupational health and safety.**
