

TRIOYAK-10

FUEL OIL CONDITIONER

TRIOYAK-10; It is a very effective product used as a fuel improver. It provides homogeneity for more efficient combustion of fuel and balances its stability. It reacts with fuel and ensures the separation of water in tanks and separators.

PRODUCT FEATURES AND BENEFITS

- It improves combustion quality by dispersing fuel components.
- It retains heavy oil residues and prevents filter obstructions.
- It dissolves the existing sludge deposits formed in the tanks and mixes them with the fuel and prevents the formation of new sludge.
- It extends system life in regular use. It reduces separator and filter maintenance costs.
- It is an effective corrosion inhibitor in fuel.

DOSAGE AMOUNT AND INTENDED USE

The most suitable method to be completely absorbed by the fuel is to give it to the fuel pipe with the help of a dosing pump. If this method is not possible, it should be poured directly into the fuel tank before the fuel is taken into the tanks.

The amount of use of **TRIOYAK-10** is 1 lt for 4-6 tons of fuel.

The amount of use in frozen fuels is 3-5 liters for 1 ton of fuel.

NOTE: Please review the MSDS reports before use for safety, occupational health and safety.
