

TRIO CEM

CEMENT REMOVER

TRIO-CEM; An effective cement cleaner mixture of strong acids and metal-protective corrosion inhibitors.

PRODUCT FEATURES AND BENEFITS

- It is used to remove dry cement stains, clinkers, limescale deposits and stains. It is also used safely on rubber and plastic surfaces.
- Suitable for use on all metal surfaces except aluminium, zinc, copper alloys and weak metals such as galvanizing.

DOSAGE AMOUNT AND INTENDED USE

Before using the product, the tanks should be pre-washed with high pressure water. Before using the chemical, make sure that the surfaces are dry.

SPOT & POINT CLEANING METHOD

With heavy contamination, concentrate should be used without dilution of the product. It can be used by diluting it with 10-30 percent water for mild contamination. Spray the prepared solution on the surface and wait for it to react at a surface for 15-20 minutes. Rinse with fresh water after cleaning is completed.

The phrases provided above are standard flushing procedures and the tank will vary depending on the physical condition of the warehouses and the type of load.

NOTE: Please review the MSDS reports before use for safety, occupational health and safety.
