

TRIO DISC

SEPARATOR CLEANER

TRIO-DISC; It is a concentrated product of surfactants and acids used in the cleaning of lime, oil and dirt deposits in oil and fuel separators.

PRODUCT FEATURES AND BENEFITS

- It is very effective in cleaning the oil and fuel separators.
- Thanks to the corrosion inhibitors it contains, it does not cause corrosion on the surfaces it is applied.
- No damage to plastic components.
- Not suitable for use in sensitive metals such as aluminium, zinc, copper and galvanizing. Suitable for use on discs such as iron, cast and steel.
- It is capable of dissolving oil, grease and carbon deposits at the same time together with rust and rust stains.

DOSAGE AMOUNT AND INTENDED USE

The product can be used concentrated or diluted up to 20% depending on the amount of pollution. Heating the prepared solution up to 60°C will accelerate the cleaning process. The parts should be immersed in the solution prepared at a maximum rate of 20% and kept for 1-2 hours depending on the amount of contamination. After cleaning, rinse with plenty of water and neutralize.

NOTE: Please review the **MSDS reports before use for safety, occupational health and safety.**
