

TRIO MURIATIC ACID

MURIATIC ACID; It is a concentrated product used for the purpose of cleaning contaminants such as lime, rust, cement etc. in cargo tanks.

PRODUCT FEATURES AND BENEFITS

- Ensure surfaces are dry before using the product.
- No damage to plastic components.
- It solves impurities such as lime, rust, cement etc. by penetrating quickly.
- Suitable for use in other metals except weak metals such as aluminium, zinc, copper and galvanizing.
- Since it is a smoky product, appropriate ventilation conditions have to be met during use.

DOSAGE AMOUNT AND INTENDED USE

Depending on the contamination rate, it is possible to dilute. In case of heavy contamination, concentrate should be used without diluting the product, and in case of milder contamination, dilution should be performed in the range of 10-50%.

The phrases provided above are standard flushing procedures and the tank will vary depending on the physical condition of the warehouses and the type of load.

NOTE: Please review the MSDS reports before use for safety, occupational health and safety.
