

# TRIO-BAW / A

## Ballast Water Treatment

### FEATURES:

- \* TRIO-BAW/A is a liquid effective treatment chemical which is used for keeping mud in suspension therefore prevents corrosion that may occur due to microorganismic impurities.
- \* TRIO-BAW/A eliminates sediment, mud, silt and completely soluble in water.
- \* It creates a protective film layer on metal surfaces by reducing pitting and general corrosion if a chemical treatment is not available.

### APPLICATION METHODS:

- \* TRIO-BAW/A dosage rate is 10-15 Kg to 100 tones of balast water.

### PACKAGING AND STORAGE:

The packaging is in 20-25-30 KG plastic drums and the storage period is 2 years.
