

TRIO ANTIFREEZE

ANTIFREEZE

It decreases the freezing point in cooling systems, increases the boiling point, prevents corrosion and rusting. It is recommended to be used in 4 seasons because it prevents freezing in winter and also prevents heat in summer. It is corrosion inhibitor reinforced, thus protecting metal parts, preventing chloride and stone formation. It can be mixed with water in any ratio depending on the desired protection temperature. It is a ethylene glycol-based product and corrosion inhibitors are reinforced.
