

TRIOYAK-900 BIOCID

Marine Diesel Fuel Biocide

TRIOYAK-900 BIOCID; Specially designed biocide against microorganism-induced fuel pollution in marine diesel fuels. Microorganisms corrode fuel storage tanks and systems. It also causes fuel degradation and occlusion of filters over time. TRIOYAK-900 kills microorganisms and prevents microorganism-related problems.

PRODUCT FEATURES AND BENEFITS

- Prevent corrosion in fuel storage tanks and fuel system.
- It kills all microorganisms in fuel oil.
- It prevents corrosion in the fuel system.
- It blocks clogging of filters and nozzles.

DOSAGE AMOUNT AND INTENDED USE

In order to eliminate the damage of microorganism-induced contaminants, TRIOYAK-900 Biocide fuel tanks should be periodically dosed with 0.3 lt/ton.

If the amount of fuel passing through the fuel tanks is unknown, a dosage of 0,8 lt/ton should be performed.

Shocking should be performed in filter obstructions. Shock amount is 4 lt/ton.

NOTE: Please review the MSDS reports before use for safety, occupational health and safety.
