

TRIO T-WELL SINT 299 WB

BILGE CLEANER

SINT-299WB; It is a water-based concentrated product used for cleaning wastes and contaminants such as mineral oil, oil wastes, grease, soot etc. formed in bilge tanks and bottom tanks.

PRODUCT FEATURES AND BENEFITS

- It is a water-based ecologically degradable product specially developed for bilge cleaning.
- Suitable for use with bilge separators.
- It is a concentrated product and it is possible to dilute it with water.
- It does not contain petroleum solvents and solvent. Biologically degradable in nature.
- It easily populates and does not leave residue after cleaning.

DOSAGE AMOUNT AND INTENDED USE

Depending on the amount of pollution, the product is diluted concentrated or up to 1/1-1/8 and applied to the dirty surface with the help of a gun, brush or spray apparatus. It is expected to react for 30-40 minutes. After cleaning, if possible, the entire surface should be washed with hot water using a water jet.

NOTE: Please review the MSDS reports before use for safety, occupational health and safety.
