

# **TRIO T-WELL STEP HIGH X**

## **WATER BASED FUEL-OIL CLEANER**

**STEP HIGH/X;** It is a water-based concentrated product used in the cleaning of fuel oil tanks, fuel oil lines, overflow pipes, overflow pans and fuel-oil deposits formed on the deck.

### **PRODUCT FEATURES AND BENEFITS**

- It does not contain petroleum solvents and hydrocarbon compounds.
- Biologically degradable, water-based product and fragrant.
- When the product is diluted with water, it becomes clear.
- It is an economical product and easy to use.
- It can be used safely in all metal types. It is not corrosive.

### **DOSAGE AMOUNT AND INTENDED USE**

If possible, pre-washing at (50-55°C) before use will facilitate the cleaning process. The dilution rate varies depending on the amount of pollution.

**Cleaning Methods;** Spraying, brushing, dipping.

**Spraying and Brushing Method;** The concentrated or 1/1-1/8 diluted product is sprayed on the surface depending on the pollution rate on the surface to be cleaned. After waiting for 5-10 minutes, the reaction time is shortened with the help of sponge or brush and the cleaning is performed. After cleaning, rinse with plenty of water.

**Immersion Method;** 5-10% chemical solution is prepared in a suitable container according to the contamination rate of the surface to be cleaned. It is expected to react for 3-5 hours by heating the solution temperature to 50-55°C. After cleaning, rinse with plenty of water..

**NOTE:** Please review the MSDS reports before use for safety, occupational health and safety.
