

TRIO VENKOR

PRE-WORK HAND PROTECTION CREAM BARRIER CREAM – SECRET GLOVES

TRIO-VENKOR 250; It is a hand protection cream that prevents the contamination and deformation that may occur in the hands by applying to the hands before the work. Also known as barrier cream or concealed glove.

PRODUCT FEATURES AND BENEFITS

- It is hand and skin protection against oil-based working substances and contains special emulsifier that reduces the adhesive effect of water insoluble substances on hands and skin.
- The product is applied to the hands before working with substances such as water insoluble oils, oil paints, graphite, metal powder, resins, grease, adhesives, toluene, tar, asphalt, adhesives, glass fiber powders, lacquers, acrylates, hydrocarbons, tannin, sinter; it protects the hands and skin from the damage of these substances and heavy contamination.
- This type of heavy dirt provides very easy cleaning of hands and skin.
- Venkor contains a high proportion of active ingredients; thus, it forms a physical protective layer on the skin.
- It prevents harmful substances insoluble in water from harming the skin.
- Thanks to the moisturizers in its content, it softens the skin.

DOSAGE AMOUNT AND INTENDED USE

- * Before doing dirty work, hands and especially nail bottoms are rubbed with some product and kept until they are dry.
- * After each hand washing process, the application should be repeated with protection cream.
- * Hands are washed normally at the end of the most recent work, no additional cleaning is required.

- **NOTE:** The duration of effectiveness of the product is between 2-4 hours according to the intensity of pollution and contact frequency.

NOTE: Please review the MSDS reports before use for safety, occupational health and safety.
